

# 3 for Me

## World-Class Hospice Communication and Care

Kindful understands the challenging task of coordinating and overseeing end-of-life care between communities and hospice. Our "3 for Me" program allows Kindful to provide elite communications to assure best-in-class patient care.

1

### Connect

Upon entry into your facility, the Kindful team will start by engaging with the appropriate member of the community staff to collaborate on patient care and confirm patient care to be completed.

2

### Engage

A Kindful team member will execute patient care per the plan of care.

- **Nursing** conducts assessment, documenting for comfort by focusing on anxiety, breathing, constipation and pain (A,B,C & P's of bedside comfort charting) and other areas of concern as identified. Monitor medications and skin. Coordinates with the facility to attend care plan meetings as appropriate.
- **CNA** offers compassionate personal care, focusing on bathing, grooming, and assisting with activities of daily living to enhance comfort and quality of life.
- **Social Work** provides assistance with counseling for both patient and family, support with advance directives and funeral arrangements.
- **Chaplain** offers spiritual support, comforting scriptures and prayer. Facilitates connections with the patient's religious community.
- **Volunteer** visits patients for companionship and support.

3

### Leave a lasting impression

Upon completion of care, our Kindful team member will promote a positive sense of community and teamwork by reporting the care provided to the appropriate community staff. Examples of completion of care reporting include:

- **RN** - Patient medications and supplies checked.
- **CNA** - Patient bathed. Shower is clean and organized.
- **SW** - Completed DNR. Discussed funeral wishes.
- **CHP** - Spiritual preferences identified.
- Verify all communication and documentation has been completed before departure from the community.
