

Let's Talk General In-Patient Care

GOOD NEWS RATES WENT UP

We can now offer your facility a new contract for General InPatient care services.

What is GIP Care?

A general inpatient care day is a day on which an individual who has elected hospice care receives general inpatient care in an inpatient facility for pain control or acute or chronic symptom management which cannot be managed in other settings. (Medicare Benefit Policy Manual, Chapter 9, Section 40 and Section 40.1.5)

REQUIREMENTS

- Pain Control and Symptom management that cannot be managed in other settings
- Hospital
- Inpatient Hospice Unit
- SNF/NF that additionally meets the special hospice standard regarding patient and staffing (24/7 RN onsite)

BENEFITS

Caring for a seriously ill person in crisis is more than most caregivers can handle which is why Medicare established GIP care. Now that Medicare has raised GIP rates, we can pass along an increase to your facility so more patients can benefit from GIP.
